

BLACK EMOTIONAL AND MENTAL HEALTH
COLLECTIVE

BLUE PRINT ACTION PLAN

Healing Justice requires a radical shift in the way we do our work. How will you shift your work to reflect what you have learned?

How does your work currently support the needs of those who are using meth? How does this fit into your organization's/church's/community/movement's role and mission?

How can you leverage your strategies to increase support to your community? Consider both support offered within your org and other community-based services.

What healing justice informed strategies do you need to create? How do you need to build healing justice into your organization/church/community/movement?

**What support do you have to make these changes?
What support do you need?**
